Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, Zustand, Context API

Backend: Core Java, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring AI, REST APIs, JWT, OAuth2, RBAC, PostgreSQL, MySQL

Tools: Git, GitHub, Maven, Gradle, Docker (basic), Apache Kafka, AWS, CI/CD, Okta

Fundamentals: OOP, SOLID Principles, IoC, Dependency Injection, Design Patterns, LLD

Experience

Software Engineer, MRI Software – Bangalore

July 2024 – Present

- Engineered a scalable full-stack rent payment platform serving **50K+ users**, implementing **RBAC** across tenants, property managers, and admins within a microservices architecture.
- Designed **idempotent payment processing** and integrated **Google Pay**, ensuring reliable and consistent financial transactions.
- Built **fault-tolerant microservices** using **retry mechanisms and circuit breakers**, improving resilience across multiple downstream service integrations.
- Implemented **caching strategies** to reduce latency and optimize performance under high concurrency.
- Managed **inter-service communication** via **Open Feign**, enabling efficient orchestration across microservices.
- Owned and enhanced the front-end system, optimizing state management, API integration, and user flows for better performance and user experience.
- Strengthened platform security by implementing **MFA (email + SMS) using Twilio**.
- Led **Java 8 → Java 21** migration, modernizing the codebase and improving performance and maintainability.
- Established **CI/CD pipelines** using **GitHub Actions**, automating build, test, and deployment workflows.

Software Engineer, In Time Tec – Jaipur

Feb 2022 – Sept 2023

- Engineered the frontend of an e-commerce platform at Intimetec with **RBAC-based access control** for secure and role-specific user experiences.
- Integrated and managed REST APIs using Axios, handling asynchronous data flows and improving application reliability.
- Enhanced performance and usability by building responsive, reusable UI components and optimizing frontend data handling.
- Partnered with cross-functional teams to streamline API integration and feature delivery, ensuring consistency across the application.

Personal Projects

Expense Manager Application

- Developed, dockerized, and deployed a full-stack expense management application on Amazon Web Services (AWS) to track personal and group expenses with real-time updates.
- Designed and implemented group management features, enabling users to create groups, add members, and manage shared expenses efficiently.
- Built secure RESTful APIs using Spring Security with JWT-based authentication and refresh token rotation for expense tracking, group operations, and settlements.
- Implemented expense splitting and settlement logic, ensuring accurate financial tracking between users.
- Developed forgot password and email verification workflows using Java Mail with secure, token-based validation.

Education

Rajasthan Technical University, BTech in Computer Science - 8.89 CGPA

Aug 2018 – Jul 2022

Achievement

- Secured **1st place in MRI Hackathon** by building voice chatbot for tenant calls.
- Core Value Award** for outstanding contributions and impact on product quality.
